

Recommended type of race course to organise a RACES regatta

- Up to 3 start procedures -

If there are 1, 2 or 3 start procedures, we recommend this type of race course.

The dogleg for everyone is important to avoid contact during bearaways & the gate is also here for security reason during the luffing.

The number of laps and the distances take into the consideration the speed differential of the different boats and insure the best conditions for everyone (right race time, no waiting time between races, security,...).

Recommended type of race course to organise a RACES regatta

- For more than 3 start procedures -

If more than 3 start procedures are done (for exemple if Fyling boats are present), we recommend this type of race course.
 The main difference with the previous one is the fact that the starting line and finish line are not on the race course. Thus, there will be no dangerous boat passing between the ones in race and the others in procedure.
